SARVAA Fresh
Product Requirements Document (PRD)
Version: 1.0
Document Owner: Founder Team
Prepared By: Product Management & CTO Office
Date: June 2026

---

1. Executive Summary

SARVAA Fresh is a hyperlocal commerce platform designed to bring modern online ordering and delivery convenience to small-town India.
The company begins with fresh fruits and vegetables through the existing offline business, SR Fruits & Vegetables, and gradually expands into groceries, dairy products, household essentials, and other local commerce services.
The MVP focuses on solving a simple problem:
"Allow customers to order fresh fruits and vegetables online and receive them at their doorstep."

---

2. Product Vision

Vision Statement

Convenience Should Not Depend On Location.

Long-Term Vision

Build the most trusted hyperlocal commerce platform for Tier-2, Tier-3, and small-town India.

Mission

Digitize local commerce by connecting customers with nearby stores and providing reliable ordering, inventory management, and doorstep delivery.

Strategic Goals

Short-Term (0–6 Months)

- Launch MVP
- Validate customer demand
- Establish operational workflow
- Achieve repeat orders

Mid-Term (6–18 Months)

- Expand categories
- Build customer retention features
- Improve delivery operations

Long-Term (18+ Months)

- Multi-vendor marketplace
- Hyperlocal service ecosystem
- AI-powered commerce platform

---

3. Problem Statement

Customers in small towns face several challenges:

- Limited online ordering options
- No reliable doorstep delivery
- Lack of inventory visibility
- Time wasted visiting multiple stores
- Difficulty ordering during busy schedules

Local businesses face:

- Manual order management
- No digital presence

- Inventory tracking issues
- Limited customer reach

SARVAA Fresh addresses these problems through a simple digital ordering platform.

---

4. User Personas

Persona 1: Household Customer

Name: Sunita
Age: 34
Occupation: Homemaker
Goals:

- Order vegetables quickly
- Save travel time
- Receive fresh products

Pain Points:

- Busy schedule
- No local delivery options
- Limited transportation

Persona 2: Working Professional

Name: Ravi
Age: 28
Occupation: Private Employee
Goals:

- Order after work
- Schedule deliveries
- Use digital payments

Pain Points:

- Lack of time
- Store closing hours

Persona 3: Business Administrator

Name: Store Manager
Responsibilities:

- Manage inventory
- Process orders
- Update stock
- Track revenue

Pain Points:

- Manual bookkeeping
- Inventory inaccuracies
- Order tracking issues

---

6. Functional Requirements

Authentication Module

Customer

Features:

- Registration
- Login
- Logout
- Password reset

Fields:

- Name
- Mobile Number
- Password

Future:

- OTP Login
- Social Login

Product Catalog Module

Features:

- Category listing
- Product listing
- Search products
- Product detail page

Product Information:

- Name
- Category
- Images
- Price
- Unit
- Description
- Stock Availability

Cart Module

Features:

- Add item
- Remove item
- Update quantity
- View total price

Checkout Module

Features:

- Address selection
- Contact information
- Delivery date
- Payment method selection

Payment Module

MVP:

Cash On Delivery

Order created immediately

UPI Payment

Customer uploads payment screenshot

Admin verifies payment manually

Future:

- Automated payment gateway

Order Management Module

Customer:

- View orders
- View order status

Admin:

- View all orders
- Update status
- Cancel orders

Order States:

- Placed
- Confirmed
- Packed
- Out For Delivery
- Delivered
- Cancelled

Inventory Module

Admin Features:

- Add stock
- Update stock
- View stock levels
- Low stock warnings

Dashboard Module

Admin Dashboard Metrics:

- Orders Today
- Revenue Today
- Pending Orders
- Delivered Orders
- Inventory Alerts

---

7. Non-Functional Requirements

Performance

- Page load under 3 seconds
- API response under 500ms
- Support 100+ concurrent users

Scalability

Architecture must support:

- Additional categories
- Additional locations
- Additional stores

- Future microservices

Security

- Password hashing
- Secure authentication
- HTTPS
- Input validation
- Role-based access control

Availability

Target:
99% uptime during MVP

Maintainability

Requirements:

- Modular architecture
- API-first design
- Clean documentation
- AI-friendly codebase

Mobile Responsiveness

Website must work on:

- Android phones
- iPhones
- Tablets
- Desktop browsers

---

8. MVP Scope

Included

Customer

- Registration
- Login
- Product Catalog
- Search
- Product Details
- Cart
- Checkout
- COD
- UPI Screenshot Upload
- Order Tracking

Admin

- Dashboard
- Product Management
- Inventory Management
- Order Management

System

- Product Categories
- Order Status Tracking
- Basic Reporting

---

9. Out Of Scope (MVP)

The following will NOT be built in the first release:

- Mobile Apps
- Multi-Vendor Marketplace
- Loyalty Program
- Referral Program
- Reviews
- Ratings
- Coupons
- Push Notifications
- GPS Tracking
- AI Recommendations
- Subscription Orders
- Advanced Analytics
- Automated Delivery Routing

---

10. Future Roadmap

Phase 2

- Grocery Category
- Dairy Category
- Household Products
- WhatsApp Notifications
- OTP Login

Phase 3

- Customer Reviews
- Coupons
- Loyalty Points
- Referral Program

Phase 4

- Mobile Applications
- Vendor Management
- Multi-Store Operations

Phase 5

- Marketplace Model
- AI Recommendations
- Demand Forecasting
- Route Optimization

---

11. Success Metrics

Business Metrics

First 30 Days:

- 100 Registered Users
- 50 Orders
- 20 Repeat Customers

First 90 Days:

- 500 Registered Users
- 300 Orders
- 30% Repeat Purchase Rate

Product Metrics

- Cart Conversion Rate
- Average Order Value
- Daily Active Users
- Order Completion Rate

Operational Metrics

- Order Fulfillment Time
- Delivery Success Rate
- Inventory Accuracy

---

12. Risks And Assumptions

Risks

Operational Risk

Delivery delays may impact customer trust.

Mitigation:

- Limit service area initially.
- Manual monitoring.

Inventory Risk

Stock mismatches may create customer dissatisfaction.

Mitigation:

- Daily inventory updates.
- Low-stock alerts.

Adoption Risk

Customers may hesitate to order online.

Mitigation:

- COD support.
- Local marketing.
- Family and community referrals.

Technical Risk

Rapid MVP development may introduce bugs.

Mitigation:

- Controlled launch.
- Manual testing.
- Incremental releases.

---

13. Launch Definition

The MVP will be considered successful when:

A customer can:

1. Register
2. Browse products
3. Add items to cart

4. Checkout
5. Pay using COD or UPI
6. Track order status
7. Receive delivery

And the admin can:

1. Add products
2. Update inventory
3. Manage orders
4. Update order statuses

without manual database intervention.

Product Vision Summary

SARVAA Fresh is not a fruits and vegetables website.

It is the first step toward building a hyperlocal commerce ecosystem for small-town India where convenience, reliability, and digital access are available to every customer regardless of location.
